

Corriere Motori is a brand that can distribute Corriere automotive content on a range of platforms but under a single masthead. By taking advantage of the characteristics of each communications vehicle, it offers 4-wheel and 2-wheel enthusiasts new and different opportunities to pursue their interest.

Integration between the various solutions and high content quality is guaranteed by the overall direction of Maurizio Donelli.

On one hand, the Corriere Motori system monitors the main auto shows, and on the other creates a series of special projects on themes of absolute interest to motor fans (including travel itineraries and the special feature issues on dogs, wine and food, and sports) with targeted opportunities for the automotive and other sectors.
